

CHERMAN S

Generative AI Developer | RAG & LLM Applications

Chennai, India | +91 8940689275 | chermanprof52001@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Generative AI Developer who has shipped LLM-powered applications built on Retrieval-Augmented Generation (RAG), semantic search, and vector databases. Built a resume screening assistant and a PDF Q&A system that cut manual document review time by 40%, with ~90% retrieval accuracy on benchmark queries through tuned chunking and embedding pipelines. Strong in Python, LangChain, Langflow, MongoDB Vector Search, MCP, and REST API integration.

TECHNICAL SKILLS

Languages & Data: Python, SQL, MongoDB (Vector Search)

AI & LLM: LLMs, Prompt Engineering, RAG, Semantic Search, Vector Embeddings, Model Context Protocol (MCP)

Frameworks & Tools: LangChain, Langflow, DeepEval, Postman, REST APIs, Git

Practices: AI Workflow Design, API Integration, LLM Output Evaluation, Vector Index Optimization

EXPERIENCE

Generative AI Developer Intern | Testleaf Software Solutions Pvt. Ltd.

Chennai, India

- Built and shipped **2 LLM applications** (Resume Screening Assistant, PDF Q&A System) using Python, RAG pipelines, and custom prompt templates, cutting manual document review time by **40%**.
- Designed ingestion, chunking, and embedding workflows in MongoDB Vector Search, lifting relevant-result retrieval accuracy to **~90%** on benchmark queries.
- Connected REST APIs, Langflow, and MongoDB into modular pipelines, reducing configuration time by **30%** and enabling reuse across **2+ projects**.
- Evaluated LLM output quality with **DeepEval** in a 6-member sprint team, reducing post-release output defects by **20%**.

PROJECTS

AI Resume Screening Assistant | RAG, MongoDB, Langflow

- Built a RAG resume screening engine on MongoDB vector indexing, returning recruiter queries in sub-second time.
- Implemented semantic search over vector embeddings, matching top candidates to job descriptions with **85-90%** accuracy.
- Automated resume ingestion and retrieval end to end, saving an estimated **5+ hours per week** per recruiter.

Intelligent PDF Question-Answering System | RAG, Hybrid Retrieval, Python

- Developed a natural-language PDF Q&A system, reducing document lookup from minutes to under **10 seconds**.
- Built custom chunking and embedding pipelines feeding a hybrid retrieval layer, reaching **~88%** response accuracy on standard benchmarks.
- Packaged the core RAG architecture as a reusable backend template adopted for **2+ enterprise use cases**.

EDUCATION

B.C.A., Apollo Arts and Science College, Madras University, Chennai

Apr 2022 - Apr 2025

CGPA: 7.87 / 10.0

Higher Secondary, Schaffter Higher Secondary School | 80%

CERTIFICATIONS & LANGUAGES

Generative AI & LLM Engineering, Testleaf (Aug 2026)

Languages: English (Professional Working), Tamil (Full Professional)
