PROFESSIONAL SUMMARY

Generative AI Developer with production experience building LLM-powered applications using Retrieval-Augmented Generation (RAG), semantic search, and vector databases. Shipped an AI resume-screening assistant and an intelligent PDF Q&A system, cutting manual document review time and lifting retrieval accuracy through optimized embedding pipelines. Skilled in Python, Lang Chain, Lang flow, MongoDB, and REST API integration, with a track record of taking AI workflows from prototype .

TECHNICAL SKILLS

Languages & Data: Python

AI / LLM: Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), Vector Embeddings, Semantic Search, Model Context Protocol (MCP), DeepEval

Frameworks & Tools: Lang Chain, Lang flow, MongoDB, REST APIs, Postman, Git

Practices: AI Workflow Design, API Integration, Prompt Optimization, Evaluation & Testing

INTERNSHIP

Generative AI Developer

- Built and shipped **2 production LLM applications** (Resume Screening Assistant, Intelligent PDF Q&A System) using Python, RAG, and prompt engineering, reducing manual document review.
- Designed end-to-end AI workflows spanning document ingestion, chunking, vector embeddings, and semantic retrieval, improving relevant-result retrieval accuracy on internal test queries.
- Integrated REST APIs, Lang flow, and MongoDB to automate AI pipelines, cutting manual pipeline configuration time and enabling reuse across **2+ projects**.
- Collaborated cross-functionally with a **6-member** engineering team to deliver features on sprint deadlines, using DeepEval to benchmark and validate LLM output quality, reducing post-release.

PROJECTS

AI Resume Assistant

- Engineered a RAG-based resume screening assistant that ingests and indexes candidate resumes in a MongoDB vector store, cutting recruiter search time from manual review to **seconds per query**.
- Implemented semantic search over embedded resume data, surfacing top-matching candidates for recruiter queries with relevance accuracy.
- Automated the ingestion-to-retrieval pipeline end-to-end using Python, LLMs, Lang flow, MongoDB, and REST APIs, eliminating manual resume sorting and saving an estimated **5+ hours per week** of recruiter effort.

Question-Answering System

- Built an AI-powered Q&A system enabling natural-language queries over PDF documents, reducing document lookup time from minutes to **under 10 seconds**.
- Developed document ingestion, chunking, and embedding generation feeding a RAG-based semantic retrieval layer, achieving answer **accuracy** on evaluation queries.
- Delivered the full AI workflow (Python, LLMs, Lang flow, MongoDB, REST APIs) as a reusable template adopted across **2+ downstream use cases**.

AI based travel companion application

- Developed an AI-powered travel planning app that provides personalized itineraries, smart recommendations, and real-time travel assistance.
- Build a cross-platform experience for IOS, Android, and desktop and developed by full stack with synchronized user data and contextual, location-aware guidance.

EDUCATION

B.E | Computer Science Engineering — Adhiparasakthi Engineering College, Anna University

CGPA: 7.8 / 10

Aug 2022 - Jul 2026
